

WEALTH CREATION

GOLDENGOOSE

UNLEASHING THE POWER OF DEFI AND TRADING BOT

GoldenGoose is a DeFi project that bridges the gap between decentralized finance and foreign exchange (Forex) markets. Our mission is to provide a seamless platform that combines the advantages of smart contracts and Dapps with the potential of Forex, empowering users to leverage their crypto assets for passive income generation without KYC requirements or brokers. Our state-of-the-art trading bots optimize profitability while ensuring safety and growth. Join our vibrant community and embrace a new era of financial opportunities.

A NEW ERA IN DIGITAL WEALTH CREATION

KEY FEATURE

TRADING BOT

GoldenGoose's cutting-edge trading bots are the cornerstone of our platform. Rigorously tested, we use a multi-bot system that utilises sophisticated algorithms and technical analysis to execute Forex trades with precision and efficiency, ensuring consistent performance and diversification across multiple strategies.

MULTI-CHAIN BLOCKCHAIN

GoldenGoose operates on the BSC Blockchain with Tron, Polygon, and Arbitrum being added soon. Ensuring a seamless user experience, enabling widespread adoption, putting your crypto to work on any supported chain.

INVESTOR SPLIT

In the spirit of transparency and fairness, GoldenGoose employs a unique investment model that ensures a balanced distribution of profits. Through this model, investors enjoy a profit split between a minimum of 80% and a maximum of 100% (adjustable), providing direct participation in the success of the AI trading bot.

REWARDS

GoldenGoose rewards users on a monthly basis, allowing them to choose between claiming their rewards or compounding them within the platform. This flexibility empowers individuals to tailor their investment strategies to their specific goals and preferences, ensuring consistent and regular income generation.

NO KYC/BROKERS

By eliminating the need for KYC procedures and traditional brokers, Golden Goose establishes a decentralized and autonomous platform.

BROKERS

We use Exness and FP markets as the brokers of choice. Two of the best brokers in the world with the best leverage and proven withdrawals, yet limited access to only some countries. Investors can harness Defi technology to access these brokers through Golden Goose.

FAQ

Q: How are profits distributed?

A: 80% of the profits are distributed to investors, with 19% allocated to the Dev wallet and 1% assigned to referrals.

Q: What's the minimum deposit amount?

A: Minimum deposit is 100 USDT(BSC)

Q: Can investors claim their rewards?

A: Yes, investors have the option to claim their rewards or choose to compound them for additional growth. (We recommend considering ROI first.)

Q: What occurs when rewards are compounded?

A: Compounding involves adding the current available rewards to the total invested amount, triggering a 1% deposit tax. The compounded funds then become available for the Devs to utilize in the next week of trading.

Q: Is it possible to withdraw the invested capital?

A: Yes, investors can request withdrawal of their invested capital. The Devs can view the total requested funds and facilitate the withdrawal process depending on market condition. (Please note that the withdrawal process may take a week or two, depending on the drawdown.)

Q: Is there a possibility of capital loss?

A: Yes, in the context of trading, there is indeed a potential for capital loss. Deposits may reflect a reduced amount in the user interface (UI) if a loss were to happen. It is essential to be aware of the risks involved in trading and to make informed decisions based on your risk tolerance and financial goals.

FAQ

Q: Is there a deposit tax?

A: Yes, there is a deposit tax of 1%. This will be used for recurring operational costs such as web & domain hosting, virtual private servers, software licences, moderators and admins.

Q: Is there a lock period?

A: Yes, there will be a 30-day lock period on all deposits into the contract.

Q: What are expected returns?

A: As profits are based upon real revenue generation, we cannot guarantee a fixed return, but the profit target is around 10% per month.

Q: Is there proof of trades?

A: Yes, viewed via MyfxBook and within Dapp.

Q: How frequently are profits returned?

A: Profits are sent out monthly and will vary based on the performance of the bots for that month.

DISCLAIMER

Forex is a risky financial instrument to invest in and it is important to have an understanding of how it works before investing. Past results provide an estimate of potential profits, but no bot can guarantee safety against liquidation even with stop losses in place. This project is custodial, meaning a person (Kaitheus & D) will have full control of the money invested and the team cannot be held responsible for everyone's actions. Therefore, it is important to invest and diversify responsibly. Investors must check their local investing laws before investing.

Please only put in funds that you can live without, as all traders and investors do.
